

PRODUCT DATA SHEET

Article-No. 64.306.0 - Blaze Knit Low S1P HRO SRC

- Protection: Fiberglass Toe Cap and flexible FAP® midsole
- Plus: TPU protection in the toe area, metal free
- Upper: seamless woven SAFETY KNIT™ textile
- Lining: BreathActive functional lining
- Footbed: evercushion® BA
- Sole: rubber sole URBAN with IdCELL and Rotation Point System, 300°C heat resistant
- Sizes/Width: 39 - 47 / 11

Rubber outsole URBAN

This 300° C heat resistant HRO rubber outsole with its differently shaped profile elements offers optimal mobility and safe contact with the ground. Due to the increase of the rotation point, friction and thus tiredness can be significantly reduced.

Fiberglass Toe Cap

New developed fiberglass reinforced composite toe cap with more space for the toes, lighter than a common steel cap; antimagnetic and thermally insulating.

IdCell

The IdCELL element in the heel area consists of a very soft sponge EVA midsole and perfectly absorbs impacts and shocks when the heel strikes the ground.

EVA midsole

We injected billions of tiny bubbles in this ultra lightweight midsole for an optimal cushioning and an improved flexing action of the foot.

evercushion® BA

This anatomically designed footbed provides a high level of comfort and moisture control, giving a pleasant foot climate. This footbed, as used in high performance sports shoes, is made from a soft, opencell, resilient foam that will not compress in wear, which assures a high level of cushioning, breathability and moisture regulation.

SAFETY KNIT™

The high flexible textile cuddly fits to the foot so that you got the impression wearing a sock. The upper SAFETY KNIT™, a mixture of high quality synthetic fabrics, offers a high flexibility and a high resistance at the same time.
